

Spend less time coding,
more time **creating**.

Freedom from daily **hassles** — with GPT.

Tired of these development hassles?

Log analysis — a hassle.

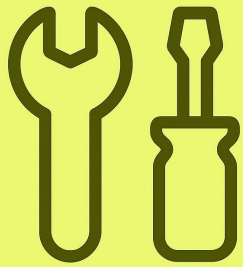

Documentation — a hassle.

Test writing — a hassle.

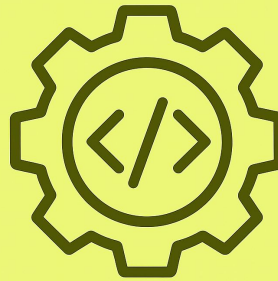

→ Sounds familiar in your work?

This GPT may rescue you from development hassles.

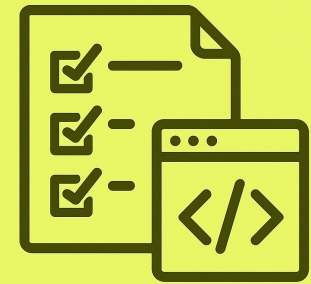

Process Automation GPT

- No-code automation for repetitive tasks
- Stay focused on real development
→ Reduce routine workload by 80%

MUMPS Auto-Code GPT

- GPT writes your code
- Fewer bugs, faster delivery
→ 2× implementation speed

Meeting Notes GPT

- 3-line summaries + auto task extraction
- From meeting to action instantly
→ Eliminate post-meeting paperwork

GPT turns daily dev hassles into minutes, not hours.

Before

Error log checks:
hours

Documentation
search: 30 min

Test creation: half
a day

After

Instant summaries
& cause hints

Auto-organized
API specs

Test code
auto-generated
from specs

→ Cut dev time by as much as 80%

3 Key Benefits of Using GPT

1. 🕒 **Time Savings**

Automate routine tasks and cut development time by up to 80%.

Focus on truly creative work.

2. 💰 **Cost Reduction**

Boost efficiency without outsourcing or extra staff.
Fewer mistakes and rework lower indirect costs.

3. ✅ **Peace of Mind**

Automatic error and omission checks.

Anyone can deliver consistent, high-quality work.
